Ossifrage

A mammalian bone-fracturing disorder, also known as "bone-eating disease." It affects individuals with a genetic mutation in the collagenase gene. Symptoms include pain, swelling, and bone erosion. Treatment options vary but may include medications, physical therapy, and in some cases, surgery.

Osseous epidermal nevus syndrome (OEN)

A rare genetic disorder characterized by the development of bone-like structures on the skin. It leads to various medical conditions, including growth abnormalities and neurological issues. Diagnosis and treatment often require multidisciplinary care.

Osteomyelitis

An infection of bone tissue, typically caused by bacteria. Symptoms include fever, pain, and swelling in the affected area. Treatment involves antibiotics and sometimes surgical intervention.

Osteonecrosis

A condition where bone tissue dies due to a lack of blood supply. It's often associated with factors like corticosteroid use, chemotherapy, and alcohol abuse. Conservative treatments such as rest and medications may be used, but surgery might be necessary in severe cases.

Osteoporosis

A metabolic bone disorder characterized by low bone mass and deterioration of bone microarchitecture. It's more common in older adults and can lead to fractures. Treatment involves lifestyle changes, medications, and sometimes bone-strengthening surgeries.

Osteosarcoma

A type of bone cancer that forms from bone-forming cells. It's commonly treated with chemotherapy, surgery, and radiation therapy. Prognosis varies depending on the age of the patient and the extent of the cancer.
he next year is now complete, and the final exams are due the following year. We will be responsible for reviewing the information provided in the previous exam. The following year will also require a lot of work, but we will be able to use the knowledge gained in the current year to prepare for the next one. The following year will also be full of challenges and opportunities for personal growth.

In summary, the final year is now complete, and we will be responsible for reviewing the information provided in the previous exam. We will use the knowledge gained in the current year to prepare for the next one, and the year will be full of challenges and opportunities for personal growth.
